Approved For Release 2006/08/08: CIA-RDP82-00457R011800360003-3 25X1 SECURITY INFORMATION (2) 25X1 bakelite curelas were seen rather than plexiglass These PT-boats were previously reported on 13 January 1952. Only Vosper-type PT-boats had been stationed in Swindmuchde prior to that data-(3)(4) 25X1 25X1 , Yessels observed in Swinsmuende on 23 October 1951, were graviously accoribed as having a relaing stem and a pointed stern; 25X1 a short and squab furnol in the middle of the beats length; a mast with a yard in front of the furnel; a gun of between 70 and 80 mm with a shield on the forecastle about 3 meters in front of the bridge; a similar gun on the quarter deck just behind the engine room skylight; a winch at the storm; and a cage-like radar device about 600 x 600 nm on the bridge. All these boats were painted dark gray. Five boats of this type have been seen.
